Project Description: This project will construct a pedestrian and bicycle overcrossing over Moffett Boulevard and the north-bound off-ramp for State Highway 85 to provide a grade separation for the existing Stevens Creek Trail. The overcrossing will be a prefabricated steel truss structure, 3.05 meters wide and 146 meters long and will consist of four spans with two abutments and three bents. Footings for the overcrossing will be constructed

on driven piles. The project will include approach ramps to the overcrossing constructed with retaining walls and a cast-in-place box structure. Additional work includes traffic signal modification, landscape and irrigation, trail detours and traffic management. The majority of the work will be constructed within the Caltrans right-of-way.
